

Snake and Ladder – Python Game

This is a digital version of the classic Snake and Ladder game built using Python and Pygame.

Features:

- 10x10 interactive board
- Dice rolling system
- Snakes and ladders logic
- Player movement and win detection
- Graphical interface using Pygame

Technologies:

- Python
- Pygame
- Game loops and event handling

What I learned:

This project helped me understand how to build turn-based game logic, handle user input, and render graphics using Python.
